CO-ORDINATING COMMITTEE

EXPORT OF ALLOY STEEL TO RUSSIA  
MEMORANDUM BY THE UNITED KINGDOM DELEGATION

The United Kingdom authorities have received an application for licence to export to Russia 2 tons of alloy steel with a f.o.b. value of £ 1.960. The material is a precipitation hardening steel containing over 4% of nickel; alloys of this description are the subject of I.L. No. 1635(c) and Interpretative Note No. 4.

2. It is intended for use in making exhaust valves for experimental motor car engines.

3. The United Kingdom authorities are satisfied that no strategic risk is involved and wish to authorise this small export as an ad hoc exception and would be grateful for the views of Member Governments by April 25.

United Kingdom Delegation,  
Paris.

April 4, 1960.
